

iSectors® Institutional Fixed Income Allocation

Portfolio Description

The iSectors® Institutional Fixed Income Allocation model seeks to provide investors with current income through a portfolio of U.S. and non-U.S. fixed income securities. The core of the model invests primarily in the U.S. fixed income instruments, including U.S. government, mortgage-backed, municipal, and corporate issues. Additional portions of the model are allocated to international fixed income securities, high-yield bonds and emerging market debt instruments in an effort to provide increased diversification and/or the potential for enhanced return. The model invests in these securities through a mix of diversified, low-cost index Exchange-Traded Funds (ETFs). Two percent of the portfolio is invested in cash and/or cash equivalents to provide liquidity and facilitate transactions. This model is intended for investors with a conservative risk utility and shorter-term time horizons.
