

iSectors® Domestic Equity Allocation

Portfolio Description

The objective of the iSectors® Domestic Equity Allocation model is to provide investors with long-term growth of capital. The model is comprised exclusively of U.S. equity securities. The diversification methodology for the allocation is based upon traditional Modern Portfolio theory through a capitalization and style-weighted (Large-Cap Growth, Small-Cap Value, etc.) approach, allocating nearly 100% of the model to low-cost, equity index-based exchange-traded funds (ETFs). The majority of the model is invested in large-capitalization issues. Two percent of the portfolio is allocated to cash

and/or money market securities to provide liquidity and facilitate transactions. The model is appropriate for investors with an aggressive risk utility and a long-term time horizon. iSectors' Domestic Allocation models are designed to have lower expenses, while offering greater transparency and liquidity, when compared to most actively-managed mutual funds.

Domestic Equity Allocation Quick Facts

as of 12/31/2011

iSectors[®] Domestic Equity Allocation

About The Manager:

iSectors[®] has developed and provides a comprehensive suite of 21 proprietary Exchange-Traded Fund (ETF)-based asset allocation models and services. Collectively, the iSectors web-based platform and series of asset allocation models offer advisors and their clients a broad selection of strategies, services and support to assist them in building and managing an appropriate investment solution designed to achieve a client's financial objectives.

Allocation models are categorized by risk and return characteristics and organized into five unique series of asset allocation approaches: Domestic, Institutional, Endowment, Post-MPT and Tactical Series. Also offered are Capital Preservation, Inflation Protection, Liquid Alternatives, and Precious Metals allocation models.

iSectors[®] ETF-based portfolios are low-cost (when compared to most actively-managed mutual funds), offer intraday liquidity, and provide transparency with respect to model holdings. All assets are held in separately or unified managed accounts titled in the client's name. Investors are fully supported by their independent registered investment advisor (RIA) and a team of back-office service professionals.

iSectors, LLC is an affiliate of Sumnicht & Associates, LLC (Sumnicht) and, as such, iSectors and Sumnicht share certain employees' services. Sumnicht & Associates was founded in 1988. iSectors became a separate Registered Investment Advisor in August, 2008.

Index Definitions

S&P 500 Index Total Return Index is an unmanaged, capitalization-weighted index of 500 large-capitalization common stocks actively traded in the United States. The total return index measures both price and dividend performance of the underlying equities in the index.

Information pertaining to iSectors advisory operations, services and fees is set forth in its current disclosure statements (Form ADV, Part 2 Brochure), a copy of which is available upon request.

iSectors' Allocation models are not guaranteed and involve risk of loss. At any given point in time, the value of an iSectors[®] Asset Allocation model may be worth more or less than the amount invested. Different types of investments and/or investment strategies involve varying levels of risk, and there can be no assurance that any specific investment or investment strategy (including the investments and/or investment strategies devised or undertaken by iSectors) will be either suitable or profitable for a client's or prospective client's portfolio. Asset allocation and diversification concepts do not ensure a profit nor protect against loss in a declining market.

You should not assume that any discussion or information contained in this presentation serves as the receipt of, or as a substitute for, personalized investment advice from an investment professional.
