

iSectors® Enhanced Conservative Allocation

Portfolio Description

The objective of the iSectors® Enhanced Conservative Allocation is to provide income and moderate long-term growth with limited downside risk. This allocation blends 60% to a sophisticated short-term ladder bond strategy and 20% to a fundamental equity strategy focused on owning stocks of multinational companies that have increased their dividends every year for many consecutive years with a 20% satellite allocation to iSectors® exclusive Post-MPT dynamic strategy. This satellite strategy reoptimizes its portfolio allocation each month based on an objective quantitative algorithm that considers monthly changes in two dozen economic and capital market factors. The portfolio is intended for investors with a conservative risk utility and an intermediate time horizon. This advanced multifaceted allocation model, though sophisticated and complex, is developed using low cost, highly liquid and transparent index-based ETFs and maintained monthly by iSectors® expert investment professionals.
