

iSectors Post-MPT Moderate Allocation

Executive Summary

Objective: To achieve moderate investment returns with lower downside risk (drawdown) over a complete market cycle.

Quarterly Performance and Attribution: iSectors Post-MPT Moderate Allocation gained 4.13% (net of fees) in the first quarter ended March 31, 2026, outperforming the 60/40 Stock/Bond Index (as measured by a 60% S&P 500 + 40% Bloomberg Aggregate Bond Index) which lost -2.62% during the same quarter. The YTD returns for the model are 4.13% compared to -2.62% for the 60/40 index.

During the first quarter of 2026, the model's energy, technology and gold investments contributed to the models positive performance. The model continues to maintain a diversified allocation.

Investment Philosophy: The iSectors Post-MPT allocations catapult Modern Portfolio Theory (MPT) to a new level of effectiveness. The investment model's strategy uses the principles of MPT to develop and maintain an optimal (along the risk vs. return efficient frontier) portfolio allocation. The key principles contributing to the iSectors Post-MPT Allocations' risk-adjusted performance success are:

- Allocation among nine low-correlated asset classes. This reduces risk vs. using the higher correlated large, mid, and small cap value, growth, and blend asset classes.
- A more robust mathematical algorithm allows the use of monthly changes in two dozen capital market and economic factors to create and maintain optimal asset allocation.
- The use of technology and index-based ETFs allows iSectors to provide its investment models at low cost.
- Post-MPT considers drawdown (any return below zero) as the measure of risk. Standard deviation, the traditional measure of risk, is inappropriate because it considers upside volatility as bad as downside volatility.

Trailing Returns

iSectors® Post-MPT Moderate Allocation -- Risk/Return Comparison Inception 3/1/2008 through 3/31/2026

Rolling Returns: Post-MPT Moderate vs. S&P 500

This graph compares an investment in iSectors Post-MPT Moderate Allocation to an investment in the S&P 500 Index. The comparison considers returns on rolling 12-month periods for both investments from 3/1/2008 to 3/31/2026. In any 12-month period that the S&P 500 was negative, the iSectors Post-MPT Moderate Allocation outperformed it during that period 85% of the time and only capture 56% of the loss. In any 12-month period that the S&P 500 was positive, but with a gain less than 10%, Post-MPT Moderate outperformed it 59% of the time, while capturing 140% of the gain. In addition, when the S&P 500 gained over 10% in a 12-month period, the iSectors Post-MPT Moderate Allocation still managed to capture 55% of the gain.

This is neither an offer nor a solicitation to buy and/or sell securities. Information pertaining to iSectors® operations, services, and fees is set forth in its current disclosure statement (Form ADV, Part 2 Brochure), a copy of which is available upon request. iSectors® asset allocation models are not guaranteed and involve risk of loss. At any given point in time, the value of iSectors® asset allocation model portfolios may be worth more or less than the amount invested. Different types of investments and/or investment strategies involve varying levels of risk, and there can be no assurance that any specific investment or investment strategy (including the investments and/or investment strategies devised or undertaken by iSectors®) will be either suitable or profitable. Certain iSectors® allocation models include an allocation to Bitcoin ETFs. These ETFs are highly volatile speculative investments subject to significant risks. Financial professionals are responsible for evaluating investments risks independently and for exercising independent judgement in determining whether investments are appropriate for their clients. Past performance may not be indicative of future results. Therefore, no current or prospective investor should assume that future performance will be profitable, or equal either the performance results reflected or any corresponding historical index. Asset allocation and diversification concepts do not ensure a profit nor protect against loss in a declining market. The historical benchmark index performance results are provided exclusively for comparison purposes to assist an advisor in determining whether the performance of a specific investment meets their respective client's investment objective(s). It should not be assumed that any account holdings will correspond directly to any comparative index. Index performance results do not reflect the impact of taxes. Indexes are not available for direct investment. Index performance results are compiled directly by each respective index and obtained by iSectors® from reliable sources. Index performance has not been independently verified by iSectors®. iSectors® models are based primarily on index ETFs that can neither outperform nor underperform their benchmark index. Net Performance results reflect the deduction of the iSectors® Strategist Fee. Actual client results will be lower based on fees for platform, advisory, transaction, and custodial services that are not set at (and may not be known at) the iSectors® level. Additionally, if your account (through your adviser or otherwise) does not fully follow a specific iSectors® model, performance would also, of course, further differ. Please consult your financial adviser for fees applicable to your account. ERISA (group retirement) accounts are subject to additional recordkeeping and/or administrative fees.
