

iSectors® Capital Preservation Allocation

6/2023

The iSectors® Capital Preservation Allocation is a strategic model that seeks principal stability over a 2-3 year period by assembling a portfolio of ETFs that collectively offer relatively low volatility. Nominal portfolio yield is a secondary goal of the model. The model primarily targets ETFs holding short-term, investment grade fixed income securities. A lesser portion of the portfolio may hold ETFs of short-term international or high yield securities. The model seeks to maintain an average investment grade rating for the entire portfolio as well as keeping portfolio duration to approximately 3 years or less.

Fee Information
 Composite performance results reflect the reinvestment of dividends and other account earnings and do not reflect the impact of taxes. Composite performance results provided are net of iSectors' standard management fee with the assumption that the fee will remain constant for all accounts. Additional fees that could be charged such as platform and custodial fees are not included. iSectors asset allocation models are available through registered investment advisors who will charge an additional fee for their advisory services. For reasons including size of account, platform provider and custodian utilized, as well as variances in portfolio account holdings, market fluctuation, the date on which an investor engaged iSectors' services, regular model rebalancing and/or updates, and timing of account contributions and withdrawals, the underlying fees and performance of a specific account may vary from other accounts. ERISA (group retirement) accounts may be subject to additional recordkeeping and/or administrative fees.
