iSectors® Liquid Alternative Allocation

iSectors® Liquid Alternatives model offers investors access to a comprehensive portfolio of alternative asset classes. The portfolio is strategic in nature but provides the added convenience of daily liquidity and transparency into model holdings.

Portfolio Description

This allocation offers investors exposure to inefficient, uncorrelated and or low correlated asset classes such as hedge funds, private equity, soft commodities, precious metals, natural resources, real estate, and other real assets. This allocation to alternative investments is intended to be utilized as an important addition to an investor's portfolio. This portfolio of liquid alternative investments is available to individuals, trusts, non-profits, retirement plans and others with no requirement that the investor be accredited. Additionally, unlike alternative investments typically structured as private partnerships, the iSectors® Liquid Alternatives Allocation charges no performance-based fees, offers online daily pricing and performance updates, has timely year-end tax reporting (no late K-1s), maintains daily liquidity, and is available for a low minimum investment of $25,000.
